

## At a Glance

DigiTel Communications provides a full range of corporate services to manage telecom and data expenses and improve network efficiencies.

### ✓ **Telecom Consulting**

DigiTel Communications has been reducing telecom and data bills for its clients since 1994. Telecom and data charges are a major expense for most companies. Telecom is also the area where you can realize significant savings working with DigiTel.

- **Assessments**
- **Billing Audits**
- **Bill Management**
- **Dispute Resolution**
- **RFP Development**
- **Vendor Procurement**
- **Contract Negotiation**

### ✓ **Network Design Services**

DigiTel Communications has vast experience moving and re-designing telecom networks. We have a long track record of accomplishments helping corporations migrate from old telecom networks to new, state-of-the-art designs.

- **Design Analysis**
- **Network Performance Evaluation**
- **Multiple Protocol Label Switching (MPLS)**
- **Carrier Services**
- **VoIP Readiness**

### ✓ **Project Management Consulting**

DigiTel Communications provides the expertise to manage large scale telecom projects. We specialize in IP Telephony and act as an extension of IT management to facilitate the assessment, design, procurement, and project implementation for converged voice and data solutions.

- **IP Communications (VoIP & PBX)**
- **Phone System Replacements & Upgrades**
- **Relocation**
- **Cabling Infrastructure**
- **Wireless LAN Networking**

### ✓ **Mobile Communications**

Corporate wireless expenses have grown more than 30% for 4 straight years. Without proper planning and administrative controls, wireless can become a "black hole" of soaring expenses. DigiTel Communications can successfully integrate wireless services and devices into your organization and provide you with a plan to manage wireless expenses.

- **RFP Development**
- **Contract Negotiation**
- **Wireless Expense Management**
- **Wireless Device Management**
